

# Resisting the Global Technocratic Coup: Seeing the Bigger Picture

David A. Hughes

Study Group on Technology and Power

Brownstone Fellow 2024/25

Omniwar Symposium, September 21, 2024

# CONTEXTUALIZING DEVELOPMENTS SINCE 2020

# The Status Quo Pre-2020

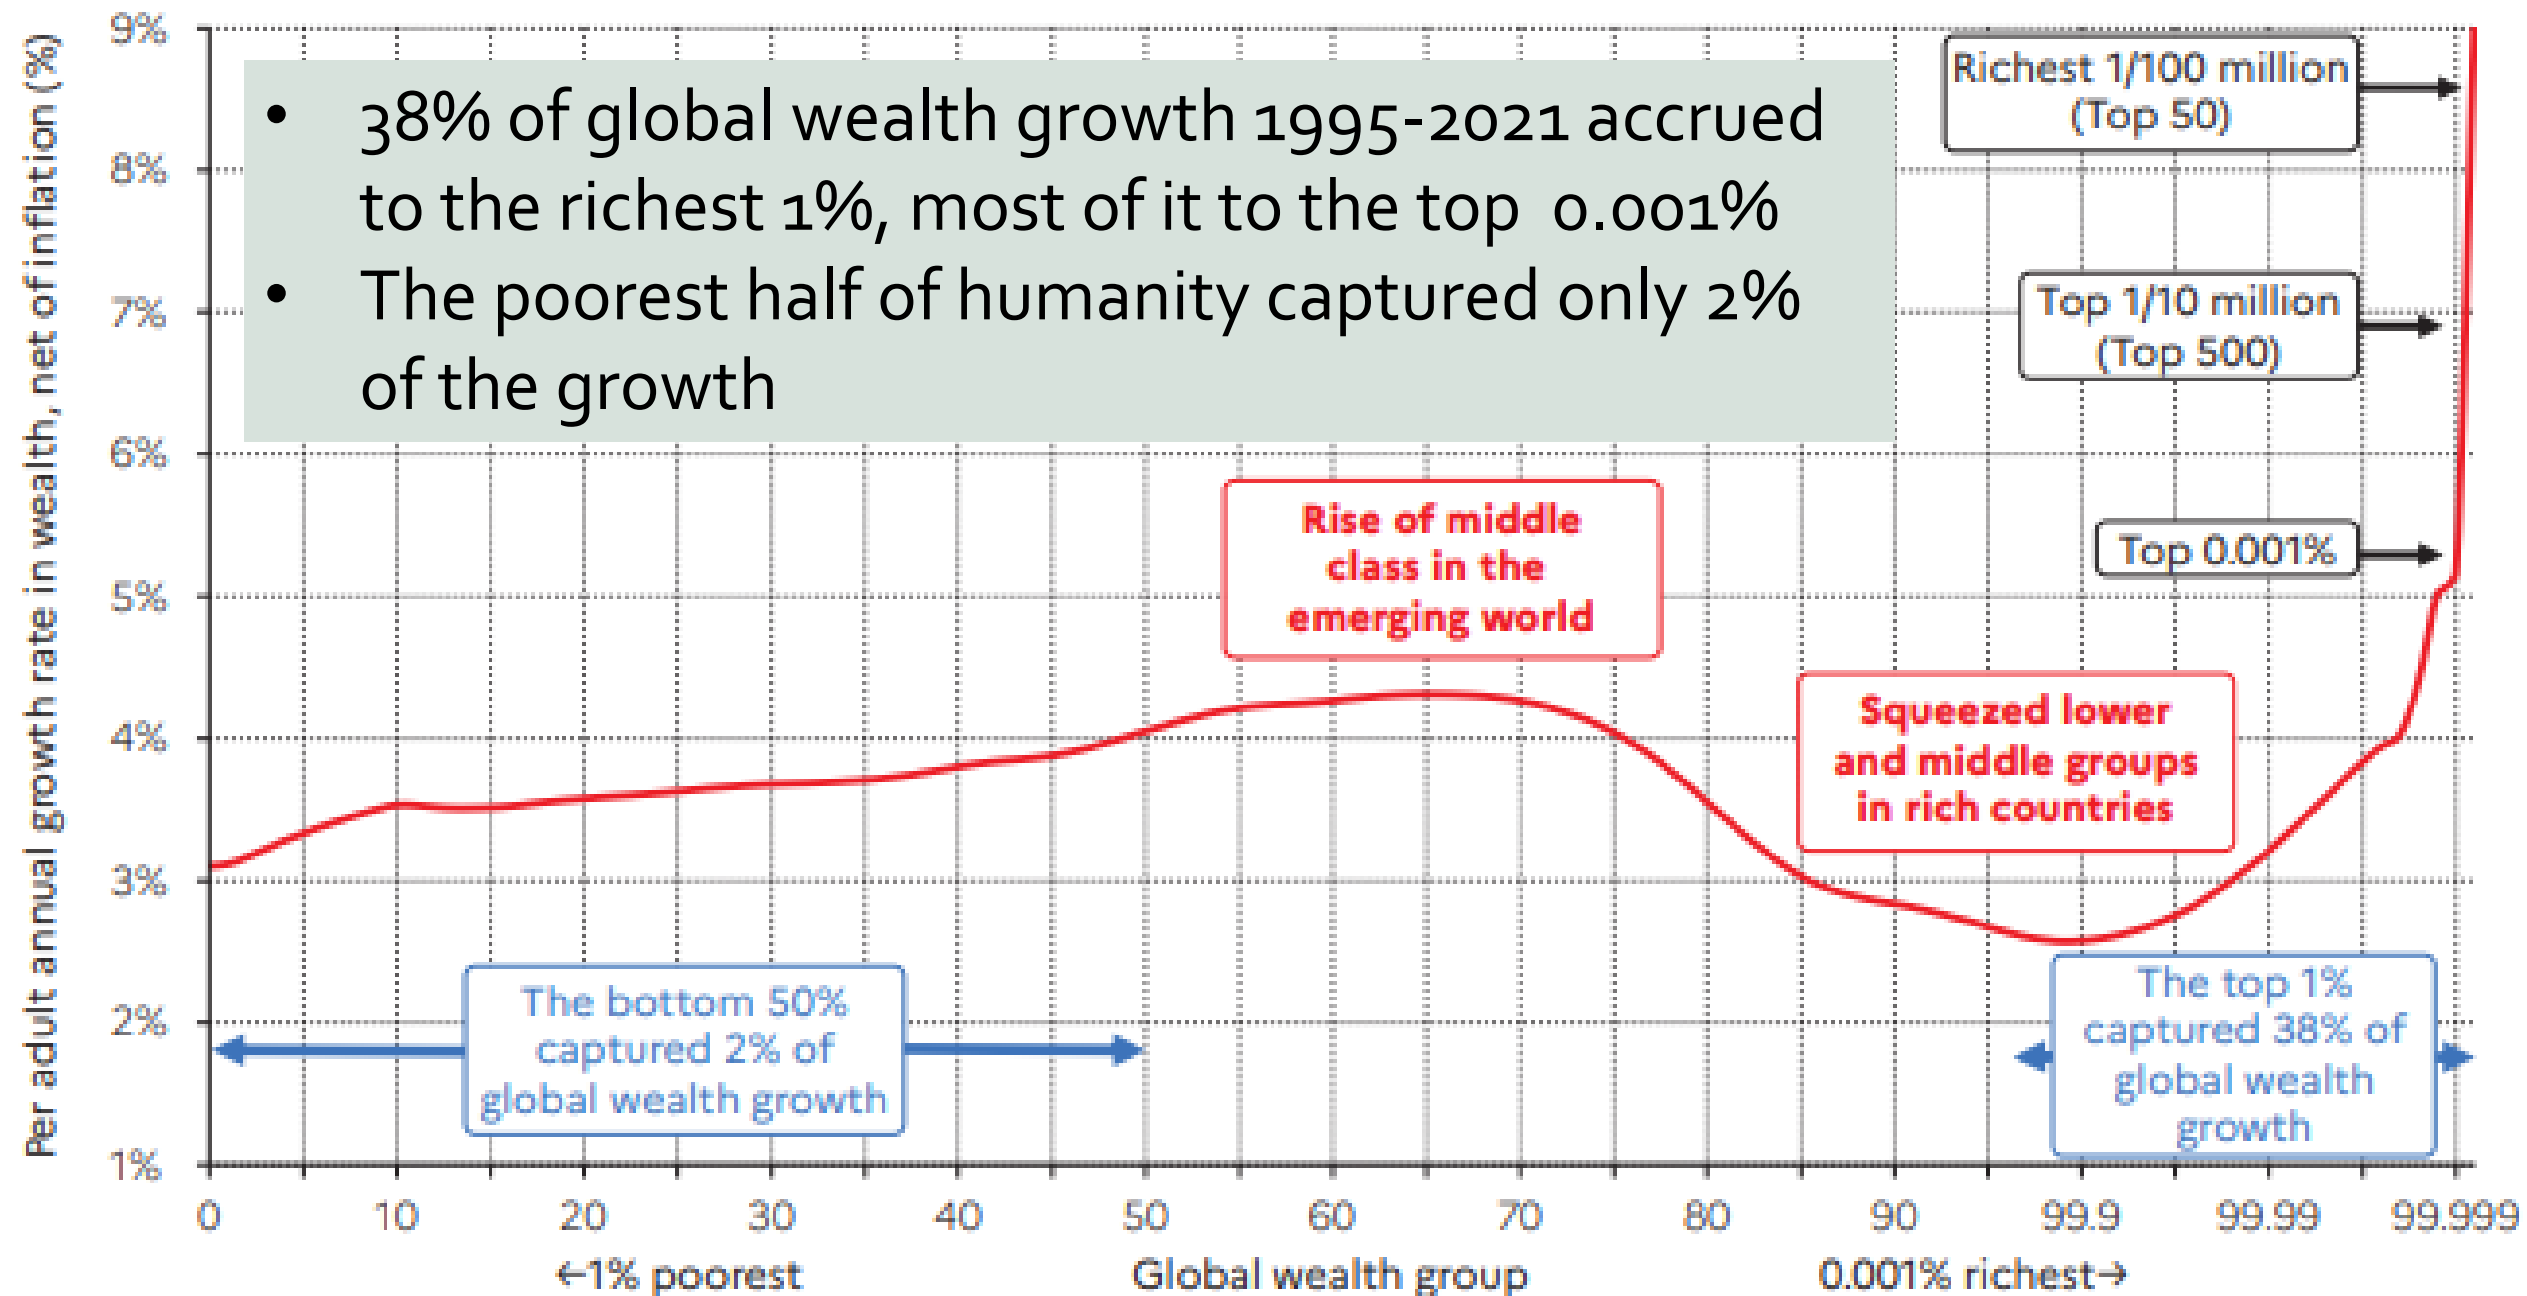

For decades, populations have been kept in check through a combination of:

1. neoliberal economics
2. the international monetary and financial system
3. the propaganda system
4. the “War on Terror” security paradigm

All of these control mechanisms entered crisis leading up to 2020

**Figure 9** Average annual wealth growth rate, 1995-2021

World Inequality Report 2022 (Chancel et al., 2022)

# Social Protests

Major protests in 35 countries (one in five) following four decades of neoliberal economics, including a decade of “austerity”

Signs of a “dangerously lopsided, oligarchic capitalism in terminal decline” (van der Pijl, 2020)

## THE STORY OF 2019: PROTESTS IN EVERY CORNER OF THE GLOBE

By Robin Wright

December 30, 2019

# The International Monetary and Financial System (IMFS) Enters Crisis

On life support since 2008 with QE

BlackRock (2019) announces that conventional monetary and fiscal policies will not be enough to deal with the next economic downturn

Mark Carney (2019) claims that the center of the IMFS “won’t hold”

## BlackRock **Investment** Institute

MACRO AND MARKET PERSPECTIVES  
AUGUST 2019

**Dealing with the next downturn:**  
From unconventional monetary policy to  
unprecedented policy coordination

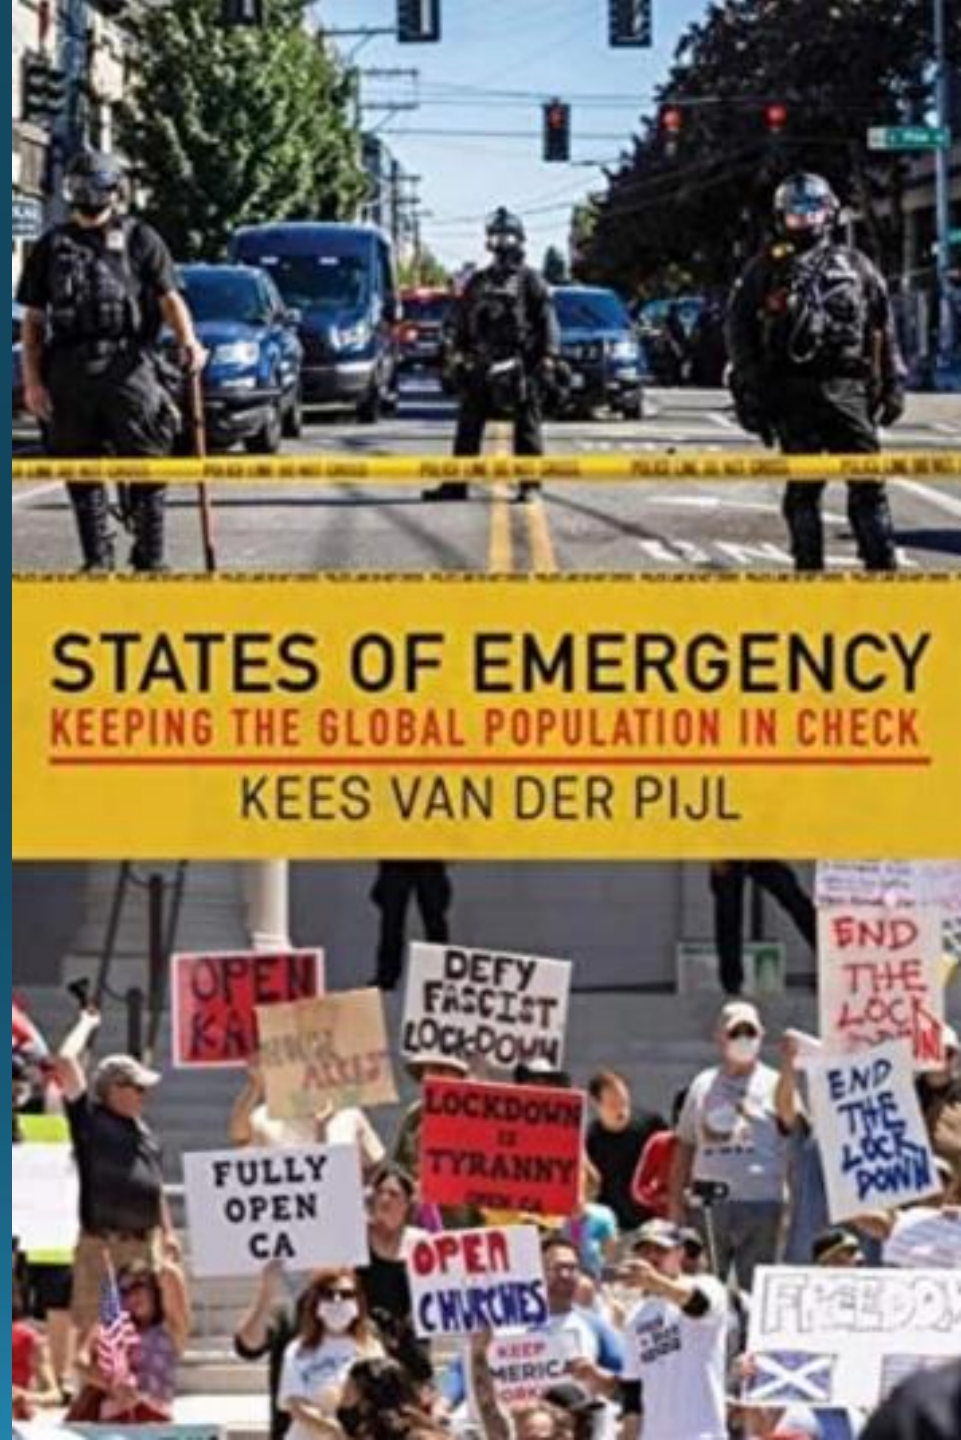

# The Propaganda System

- The Western propaganda system has been essential to the manufacturing of consent in liberal democracies for at least a century
- It was undermined by the rise of independent media and citizen journalism
- More and more people came to see through the lies, e.g. around “9/11”
- The “Russian disinformation” narrative (2016) as a pretext for censorship as narrative control start to slip

# The “War on Terror”

- Used to legitimize aggressive military measures abroad
- A pretext for repressive “emergency” measures at home: the citizenry cedes liberties and does as it is told in exchange for “security.” More terror = greater social control
- Yet, a proliferation of terror attacks (2015-2017) was not enough to prevent protests from assuming a socially progressive form (van der Pijl, 2022, pp. 54-64), culminating in the worldwide protests of 2019

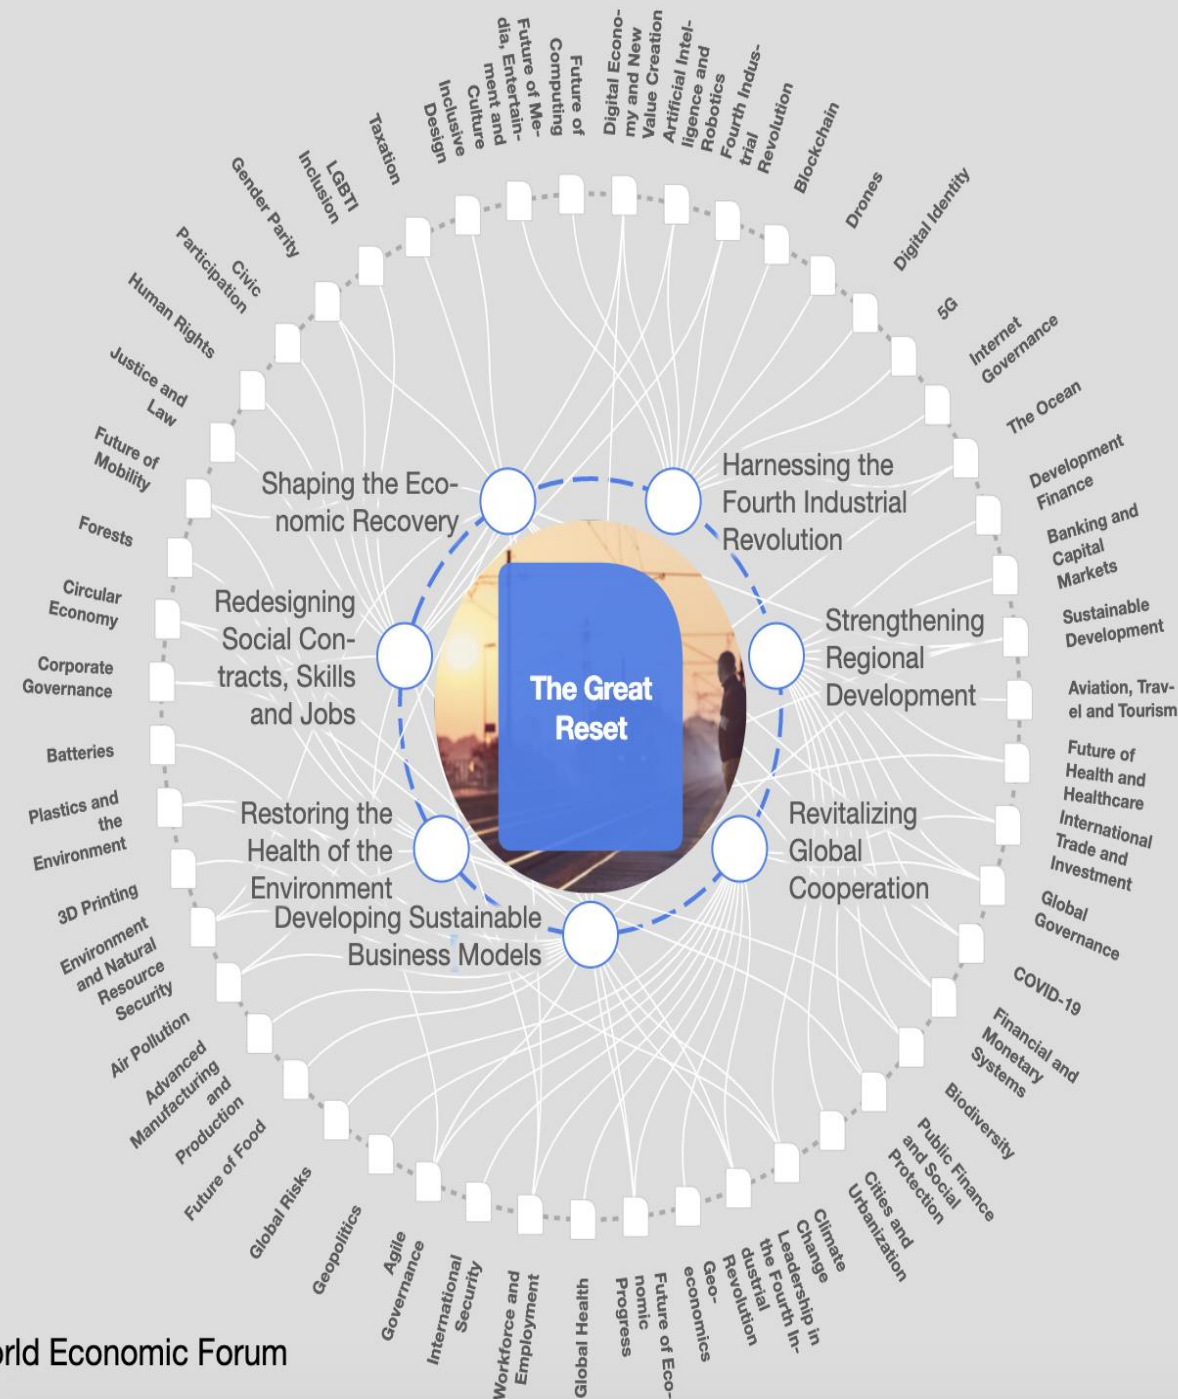

# 2020: Time for a Paradigm Shift

The “pandemic” was used as the pretext for beginning the transformation of existing governance paradigms “top to bottom” (Agamben, 2021, p. 7)

The “Great Reset” is code for a top-down revolution on a global scale (cf. Hughes, [2024b](#), pp. 17-19). The aim is to remake all of society in the preferred image of the ruling class

# The New Control Paradigm: Technocracy

- Dates back to the 1930s, but new technologies render it feasible for the first time
- Capitalism is replaced by a centrally managed economy in which everything and everyone is digitally monitored and controlled
- An all-digital financial system will give central banks direct control over the means of exchange
- Democracy is replaced by the A.I.-enabled scientific management of society (viz. social credit scoring)
- A novel, biodigital form of totalitarianism

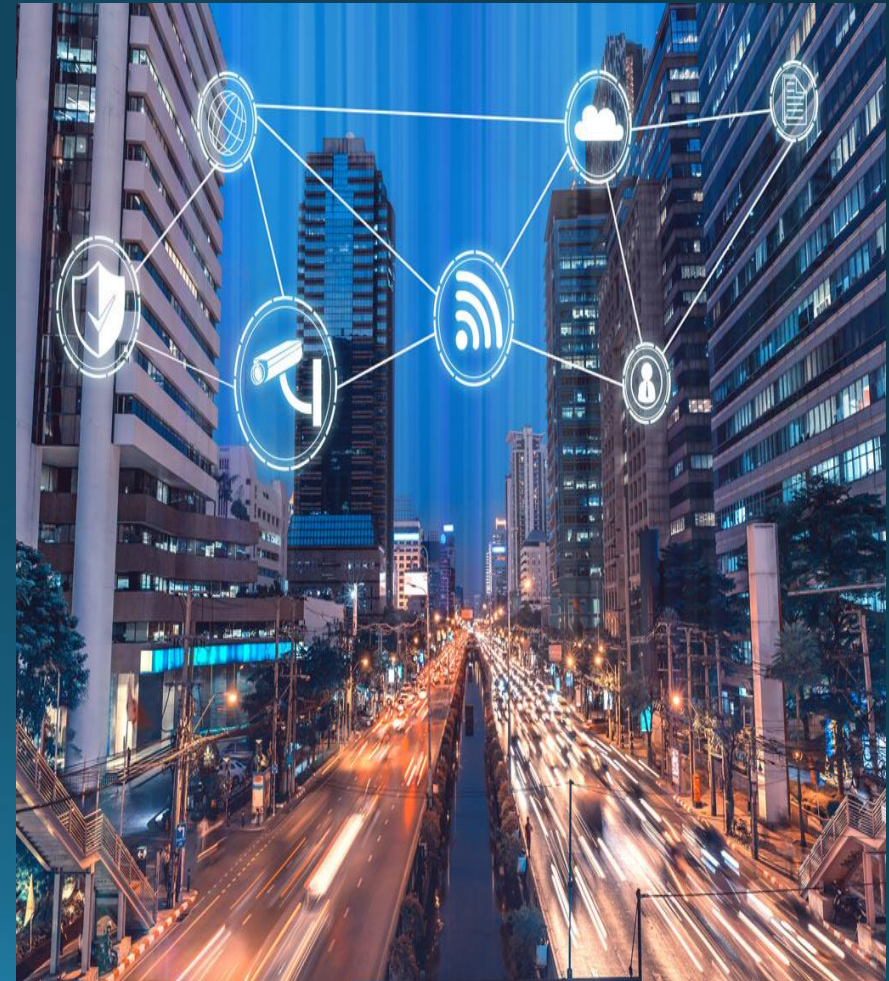

# “Smart Cities”: Epitome of Technocracy

“Smart cities pullulat[ing] with sensors, all joined together by the internet of things, bollards communing invisibly with lampposts. But this technology could also be used to keep every citizen under round-the-clock surveillance [...] Digital authoritarianism is not, alas, the stuff of dystopian fantasy but of an emerging reality” (Johnson, 2019).

The transformation of the whole of society into a “digital concentration camp” (Fitts, 2022; cf. Hughes, 2024b, p. 136; Jabbi, 2023, 28:53)

WWIII: OMNIWAR

# The War for Technocracy

- Historically, sociopolitical and economic change on the scale of the “Great Reset” has only been possible through world war
- Global technocracy can only be instituted through world war
- We now find ourselves in World War III, which assumes the form of a global class war (Hughes, 2024a, Chapter 1)

palgrave  
macmillan

# World War III

WWIII looks nothing like WWI or WWII, just as they did not resemble anything seen before (Corbett, 2020). The aims, strategies, tactics, and weapons are all different

However, the outcomes of WWIII, in terms of lives lost and the manifestation of previously unimaginable horrors, will be the same, unless those behind the war can be stopped

# MNIWAR: Characteristics

- WWII is an Omniwar, i.e. war waged across every domain of life, but clandestinely, so that the public does not recognise it as such
- Omniwar is war waged by the few against the many. A proportionately miniscule transnational ruling class seeks to use its control over the means of production to subjugate, and ultimately enslave, the rest of humanity
- Amounts to a global counterinsurgency campaign, with dissidents set to replace “terrorists” as the enemy using the infrastructure established through the “War on Terror” (cf. Valentine, 2017, p. 64)

“an all-out war that is being waged against all of us [...] right now, and it is a battle for full-spectrum dominance over every single aspect of your life: your movements and interactions, your transactions, even your innermost thoughts and feelings and desires. Governments the world over are working with corporations to leverage technology to control you down to the genomic level, and they will not stop until each and every person who resists them is subdued or eliminated” (Corbett, 2022)

# A Stealth War

“How is it possible that for some it is very clear that we are facing a coup, revolution or even Third World War, while for others everything is seeming ‘normal’?” (van Hamelen, 2022)

- The Omniwar is a *stealth* war, designed to stay hidden, lest the population realize what is happening (risk of mass resistance/revolution)
- Nothing like the Omniwar has been seen before
- Cognition and rationality are under attack
- Military-grade perception management techniques are being deployed
- Many of the weapons are invisible; some may involve classified technologies
- The sheer scale/evil of the assault is traumatic and difficult to comprehend

# THE WEAPONIZATION OF EVERYTHING

# Attacks on the Mind/Brain

- Psychological warfare (Hughes, [2024a](#))
- Cognitive warfare – “the art of using technology to alter the cognition of human targets, who are often unaware of any such attempt [...]” (Claverie & du Cluzel, [2022](#), 2-1), viz. social media, psychographics
- Electromagnetic warfare (Glaser et al., [1976](#); Department of Defence, [2012](#); Regenstein, [2023](#); Hughes, [2024c](#), [2024d](#))
- Neurological warfare (Giordano, [2012](#), [2017](#), [2018](#)) – direct brain manipulation

## NEUROTECHNOLOGY

Premises, Potential and Problems

Edited by JAMES GIORDANO

# Weaponized “Healthcare”

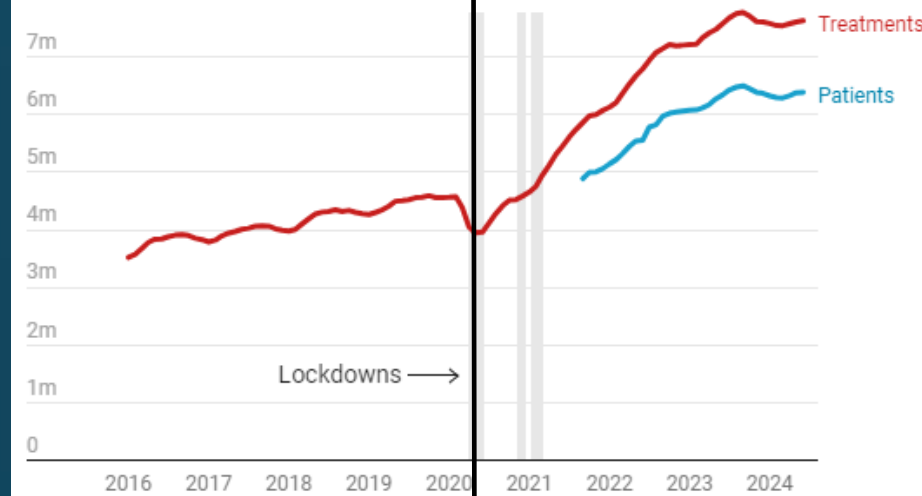

Deprivation of necessary healthcare in the name of reconfiguring health services to deal with “Covid-19” (Triggle & Jeavans, 2021; Spectator, n.d.; Stevens & Pritchard, 2020)

Public health as death by stealth (Hughes, 2024a, p. 132)

Outcome: 7.6 million NHS patients waiting for treatment today vs. fewer than 4 million at the start of 2020 – a sicker population

## NHS England waiting list

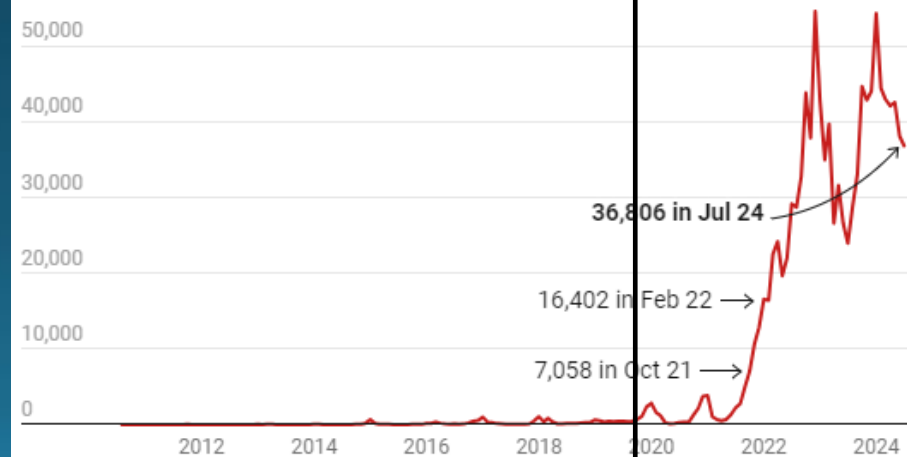

6.4m patients waiting for 7.6m treatments as of Jun24

Published 8 Aug, updated monthly. NB: number of patients is an estimate made by the NHS.  
Chart: The Spectator (pmVGq) • Source: [NHS England RTT overview time series](#) • [Get the data](#)

## A&E: 12-hour waits to admit

Number of patients spending >12 hours from decision to admit to admission each month in A&E departments in England

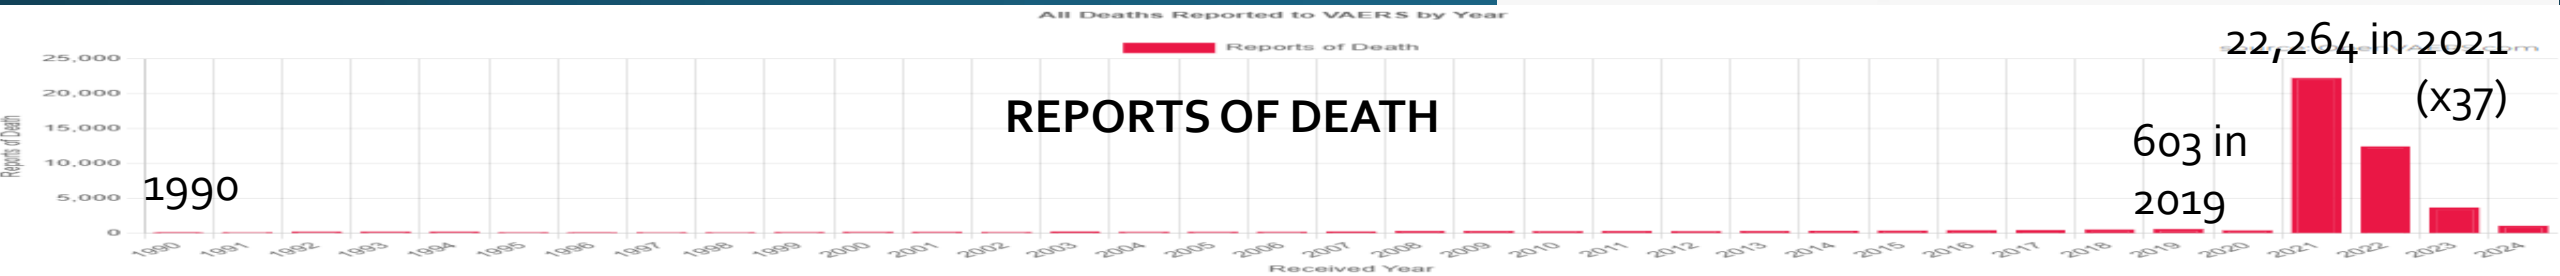

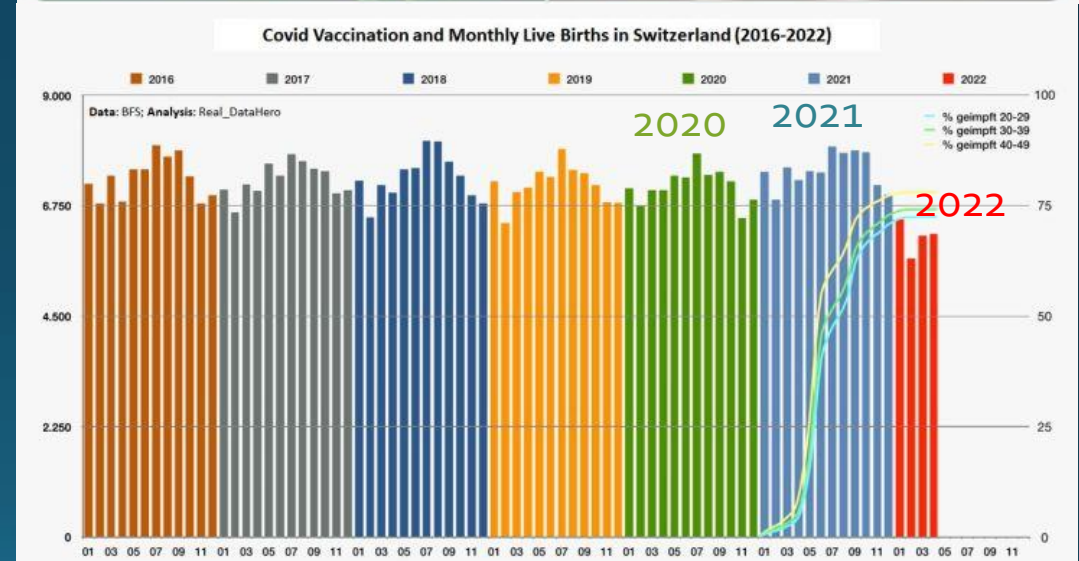

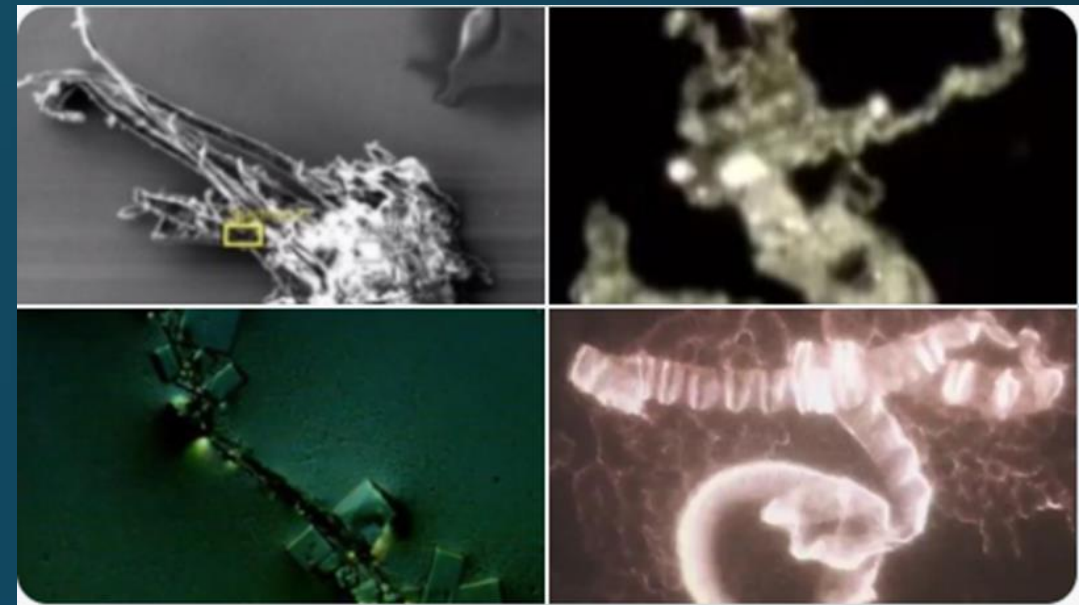

Data to Jul 24, Published 8 Aug. Updated monthly.  
Chart: The Spectator (aorwZ) • Source: [NHS – Adjusted Monthly A&E Time Series](#) • [Get the data](#)

# "Vaccines"

- Toxic "vaccines" containing an array of undisclosed ingredients (Gatti & Montanari, [2017](#); Hughes, [2022c](#); Latypova, [2022](#))
- Declines in birth rates following the "Covid-19 vaccine" rollout (Pfeiffer, [2022](#); Bujard & Andersson, [2022](#); Swiss Policy Research, [2022](#))
- Massive increases in reported serious adverse reactions (Open VAERS, [n.d.](#))

# The Great Poisoning

- Glyphosate – “probably carcinogenic” (WHO, [2018](#)) – found in 80% of U.S. urine samples (Gillam, [2022](#))
- So-called “forever chemicals” contaminating rainwater, surface water and ground soil (Isaacs-Thomas, [2023](#))
- Commonly found in food: high-fructose corn syrup (Nur Bulbul et al., [2024](#)), “possibly carcinogenic” aspartame (WHO, [2023](#)), inorganic micro- and nanosized contaminants (Gatti et al., [2009](#))

# The Water Supply

- “Fluoride in drinking water, which can cause “major adverse human health problems” (Peckham & Awofoso, 2014) and over 1.5 mg/L is “associated with lower IQ in children” (Health and Human Services, 2024)
- Potential for engineered water shortages (Hughes, 2024d)

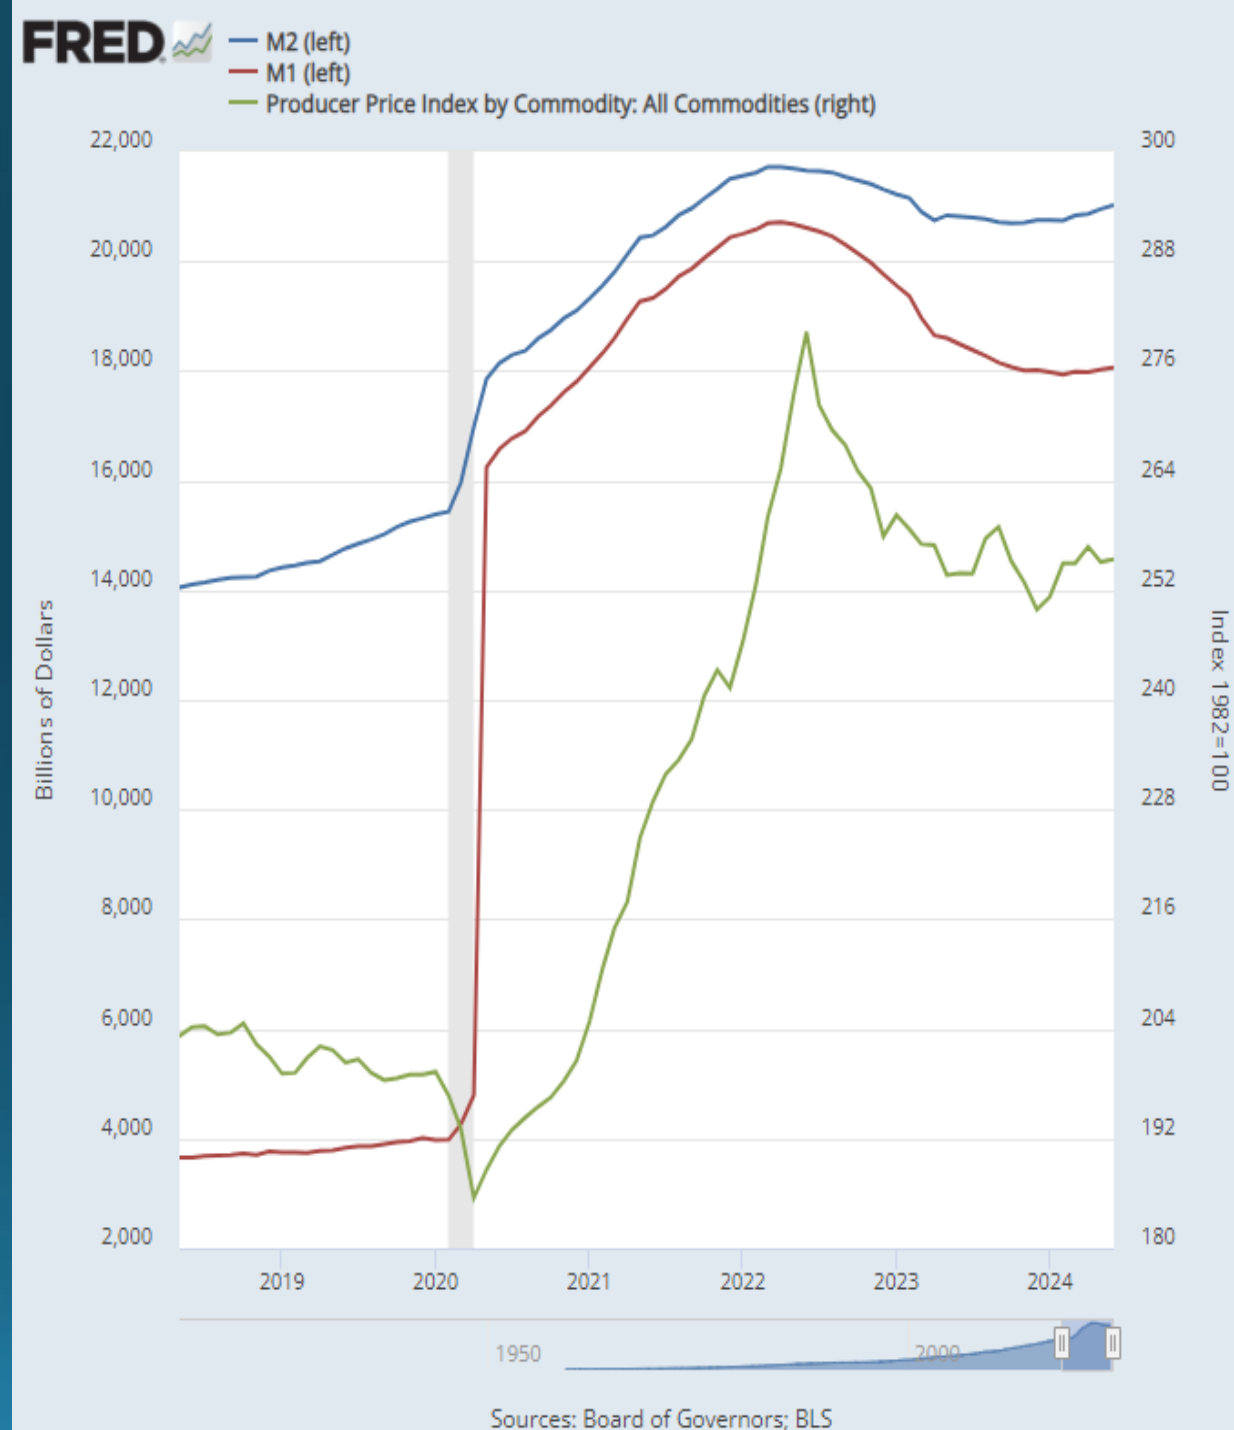

## **NTP Monograph**

**on the State of the  
Science Concerning  
Fluoride Exposure  
and Neurodevelopment  
and Cognition:  
A Systematic Review**

# Financial Warfare

- Punishing levels of inflation driven by the unprecedented increase in the money supply in 2020
- Manufactured energy shortages (e.g. Nord Stream, Ukraine)
- Financial censorship of dissidents

# Information Warfare

- Censorship, shadow-banning, “freedom of speech but not reach”
- Self-appointed “fact checkers” (Davis, 2020) and networks such as the Trusted News Initiative (Woodworth, 2022)
- The “counter-disinformation” industry (Hayward, 2022)
- All rolled out under the pretext of combatting “mis-,” “dis-,” and “malinformation,” with governments positioned as the “single source of truth” (Adern, 2021)

# Law and Order

- Police brutality used to intimidate dissidents (Broudy et al., [2022](#))
- Draconian legislation being used to expand police powers, clamp down on protests, place limits on journalism, and allow governments to regulate the internet (Hughes, [2024b](#), pp. 14-16)
- “Lawfare” being used to intimidate dissidents (Hughes, [2024b](#), pp. 14-15; Davis, [2024](#))

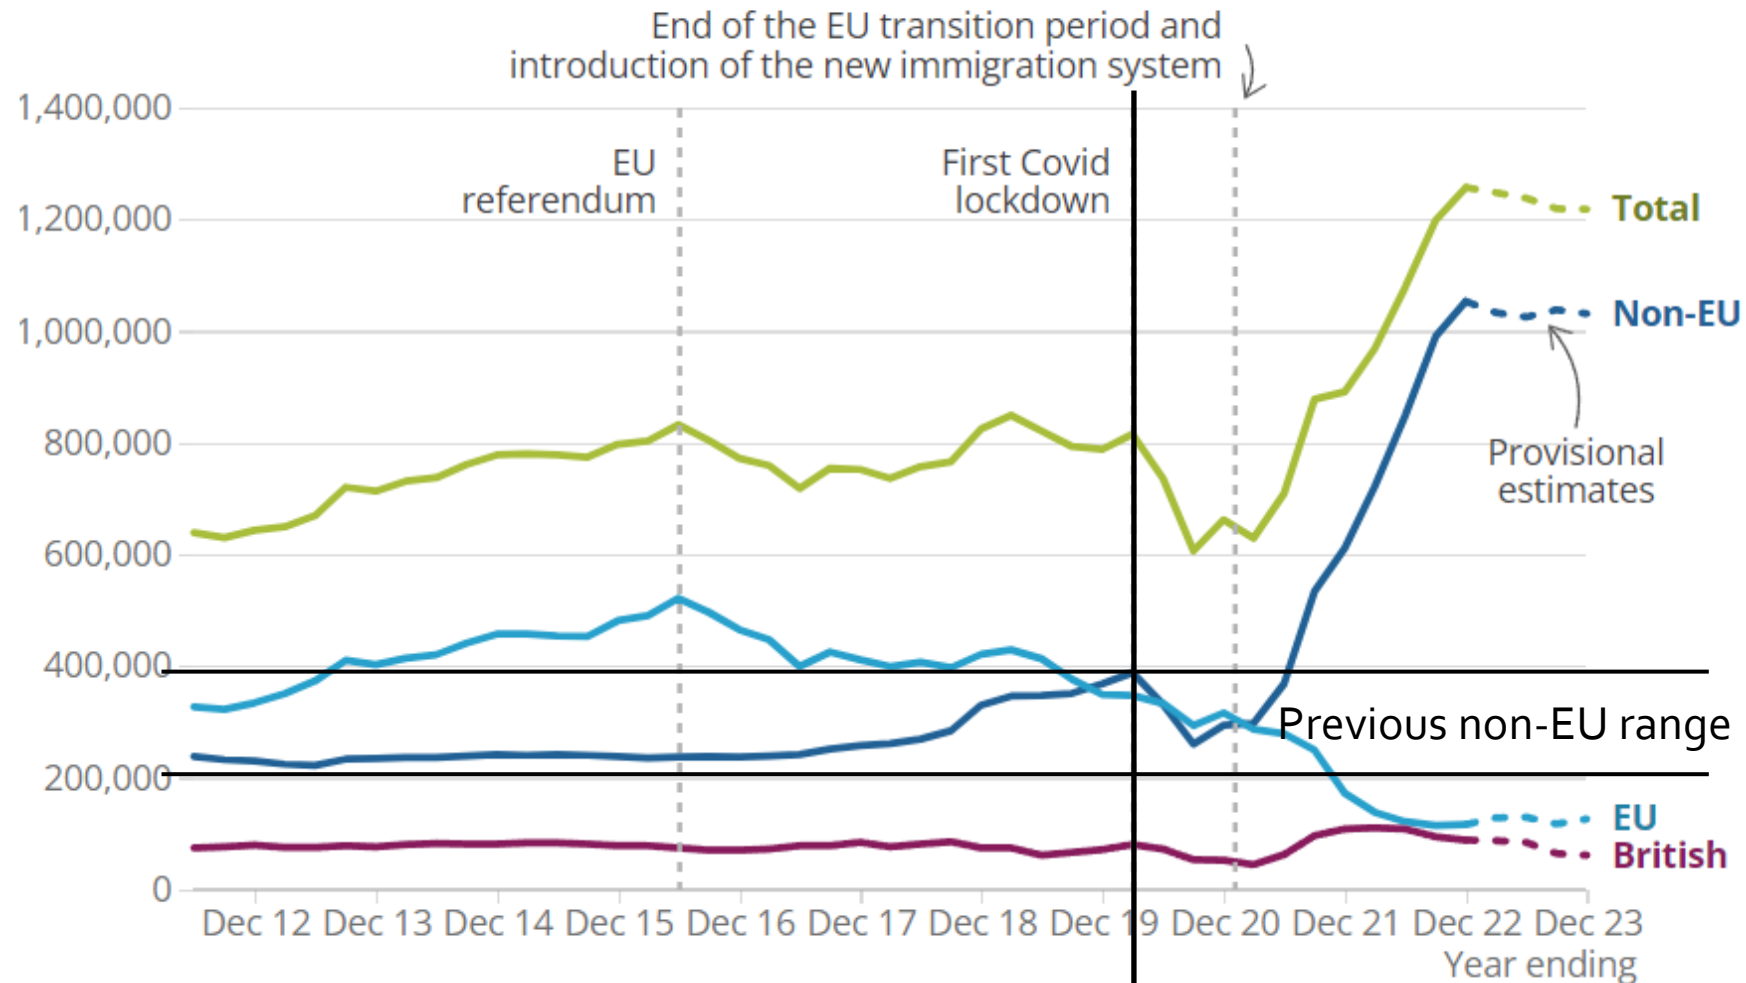

# Migration

Historically unprecedented levels of migration from non-Western countries into the West (Hughes, 2024a, pp. 331-332)

In the UK, the spike in non-EU immigration coincides with the Omniwar period

Number of non-EU, EU, and British nationals immigrating long-term to the UK, between the YE June 2012 and the YE December 2023

Source: International Passenger Survey from the Office for National Statistics, Home Office Borders and Immigration data from the Home Office, Registration and Population Interactions Database from the Department for Work and Pensions

# The Subversion of Christianity

- The complicity of the churches with the “Covid-19” agenda (Hughes, 2024b, p. 21)
- Satanic messaging laced into popular culture (Vigilant Citizen, 2024)
- Transhumanist fantasies of going “beyond the God of the Bible” (Harari, 2022)

**Jesus would get a vaccine, Archbishop of Canterbury suggests as he says getting the jab is 'not about me and my rights to choose – it's about how I love my neighbour'**

# The Entertainment Industry

Hollywood: a “vast, militarized propaganda apparatus operating throughout the screen entertainment industry in the United States” (Secker & Alford, 2017)

A music industry in which household names usually turn out to have military connections (Devlin, 2016, 2018, 2021)

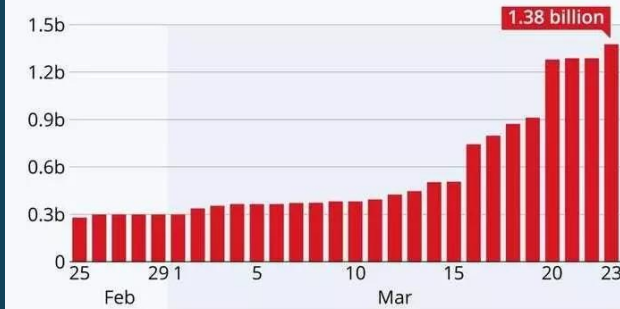

# The War on Children

- Covid restrictions on face-to-face education had “significant and adverse impacts on children’s learning” (Cabinet Office, [2021](#))
- Children were traumatized by being treated as biohazards capable of “killing granny” and being forced to wear face masks (Hughes, [2024a](#), p. 91)
- “Lockdowns” led to increased levels of domestic violence and PTSD (WHO, [2021](#), p.4)
- Children were unnecessarily targeted for dangerous experimental injections (Hughes, [2022](#))
- A worldwide paedophile network reaches into the highest echelons of power (Fitts & Rappoport, [2017](#))

## COVID-19's Staggering Impact On Global Education

Number of learners impacted by national school closures worldwide

Figures refer to learners enrolled at pre-primary, primary, lower-secondary, and upper-secondary levels of education, as well as at tertiary education levels. Source: UNESCO

Forbes statista

I could go on...

- The war on the elderly (covert euthanasia measures such as the midazolam scandal, promotion of assisted dying, removal of the UK winter fuel payment for 9.5 million pensioners)
- The tyranny of woke ideology in imposing a top-down identity politics to counteract a rise in class consciousness
- Failure of captured regulators to protect the public against known dangers of 5G, vaccines, etc.

The logic of the Omniwar is that everything that can be weaponized will be weaponized

Let us consider some aspects of the Omniwar that warrant special attention....

# NETWORK-CENTRIC WARFARE

# Network-centric Warfare

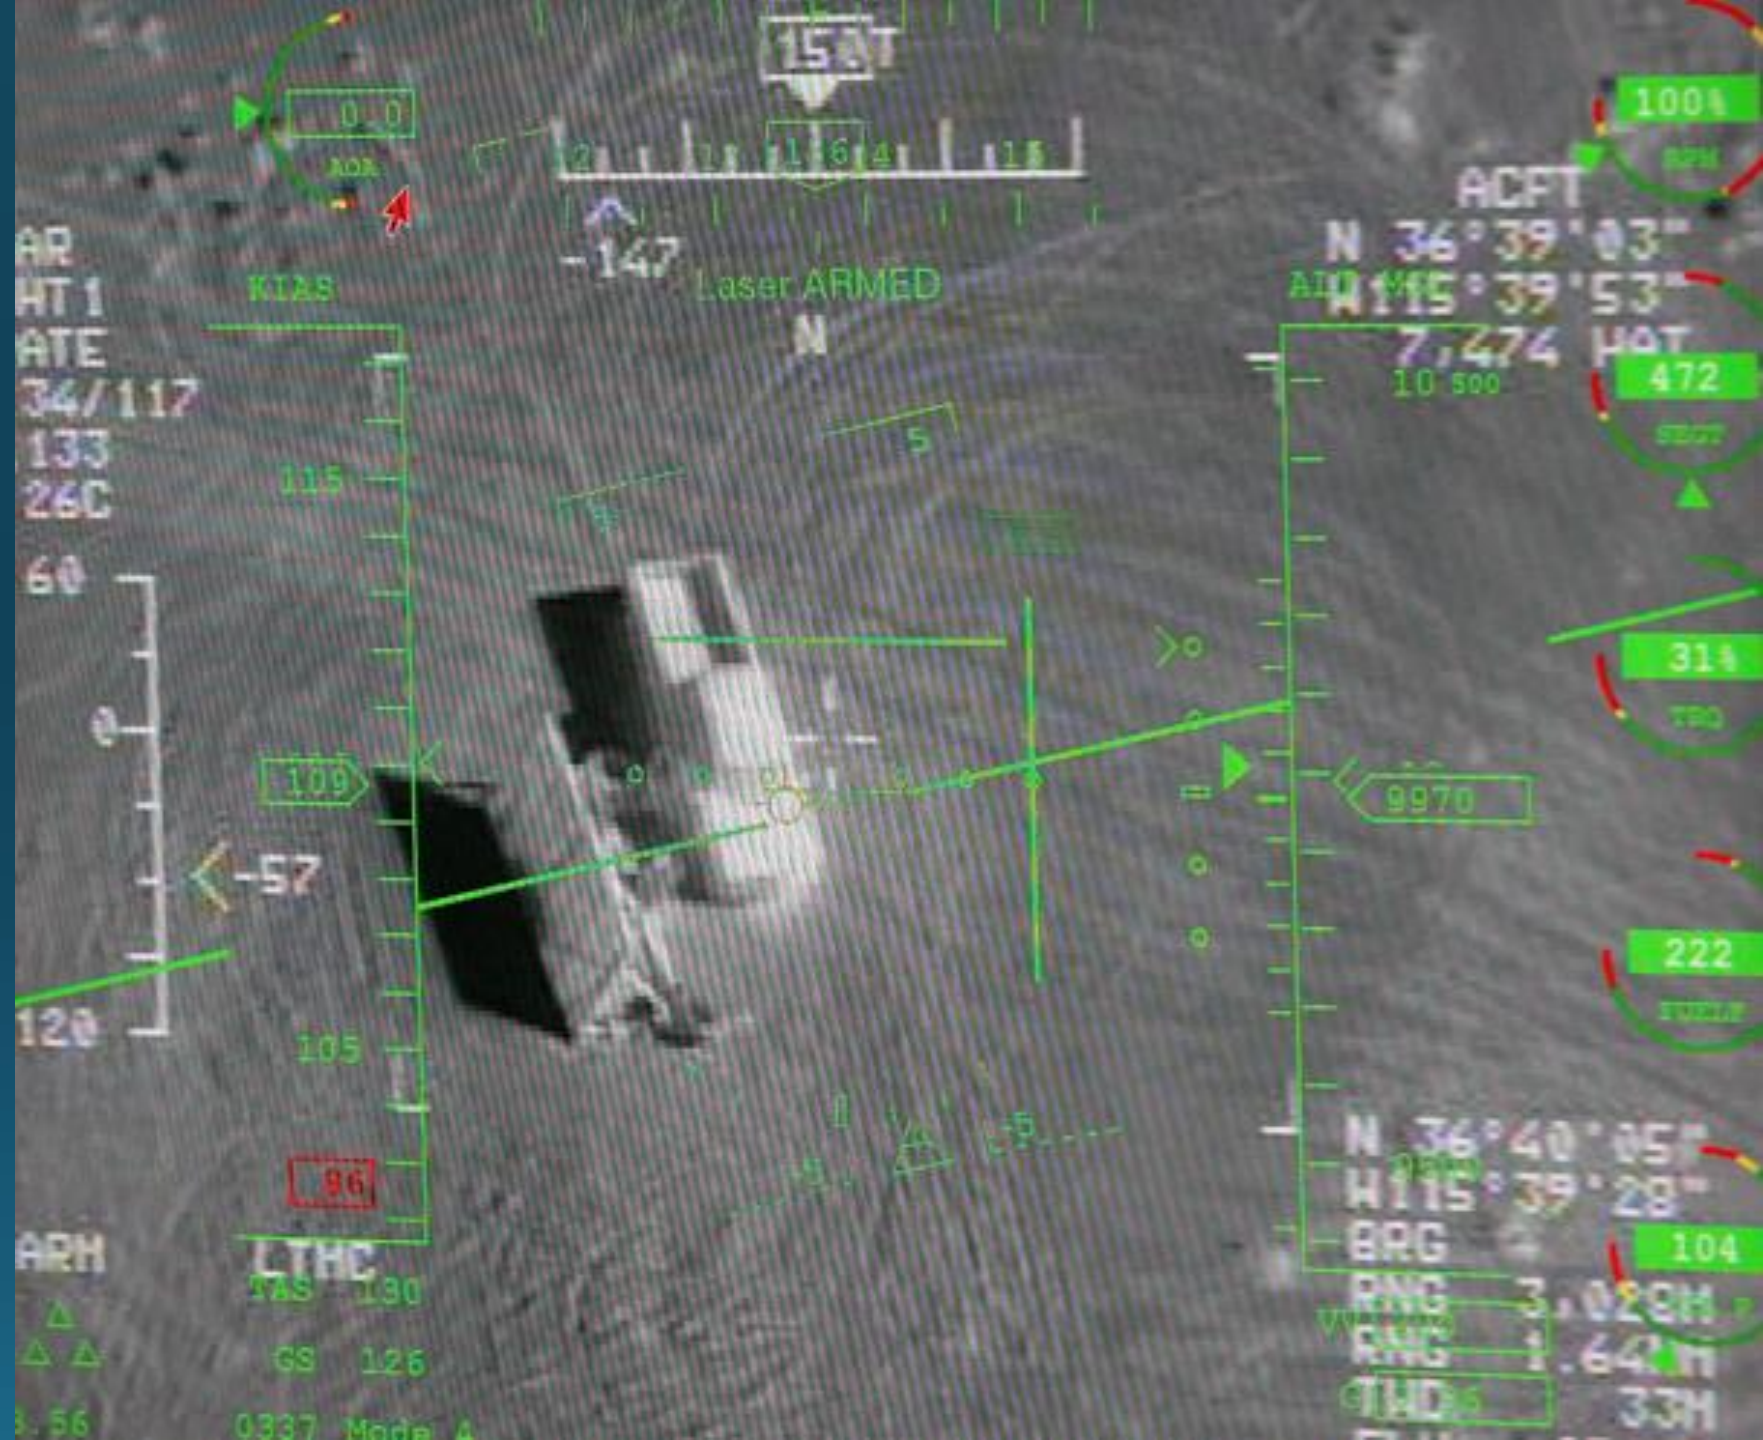

- “Places information networks at the center of our warfighting” (Marine Corps War College, 1998)
- The Global Information Grid, operated by US Strategic Command, provides the technical infrastructure
- A “system of systems,” integrating sensor systems, command and control centers, and weapons platforms
- The DoD seeks to “plug every device into it – every vehicle, every system, every drone – to form one all-encompassing net” (Ballard, 2014)

# Drone Warfare

Relies on information superiority to identify, locate, and assassinate targets, supposedly with high precision and minimal collateral damage, although disproportionately high civilian casualty rates and the deliberate tactic of “double tapping” are well known (Taylor, 2012)

# Network-Centric Warfare and A.I.

DoD Directive 3000.09, titled “Autonomy in Weapons Systems,” sets policy and assigns responsibilities for the development and usage of autonomous and semi-autonomous weapons systems, including remotely operated systems such as drones (DoD, 2012)

DoD DIRECTIVE 3000.09

AUTONOMY IN WEAPON SYSTEMS

# Project Maven (2017-)

Palantir's Maven Smart System integrates geospatial imagery (from satellites), geolocation data (from smartphones, social media, etc.), signals intelligence, and radar and infrared sensors to provide real-time battlefield analysis and target identification

Has been used to identify targets for airstrikes in Syria and Yemen in February 2024 (Manson, [2024](#))

# IDF Deployment of A.I. in Gaza

The Israeli Defense Forces used an A.I. targeting system to single out 37,000 Palestinians as suspected militants at the start of its war in Gaza (Robins-Early, 2024)

Since 2021, Google has had a \$1.2 billion deal with the IDF to provide cloud computing services and A.I. capabilities (Bhuiyan & Montgomery, 2023)

**“The machine did it coldly”: Israel used AI to identify 37,000 Hamas targets**

Israeli intelligence sources reveal use of ‘Lavender’ system in Gaza war and claim permission given to kill civilians in pursuit of low-ranking militants

# Automating the Kill Decision

Israeli weapons company Elbit Systems (n.d.)

LANIUS can autonomously take off, navigate, determine entry points to buildings, map the inside of unknown buildings, identify combatants and non combatants among the building occupants, and detonate explosive payloads (albeit with “man-in-the loop control” for the final stage)

# HUMAN BEINGS AS NODES ON A BIODIGITAL CONTROL NETWORK

What if human brains and bodies could be hooked up to the Global Information Grid?

And what if companies such as Palantir could manage all the resultant data?

Answer: global technocracy would be achieved. Everything and everyone could be controlled through scientific means

# Biodigital Convergence

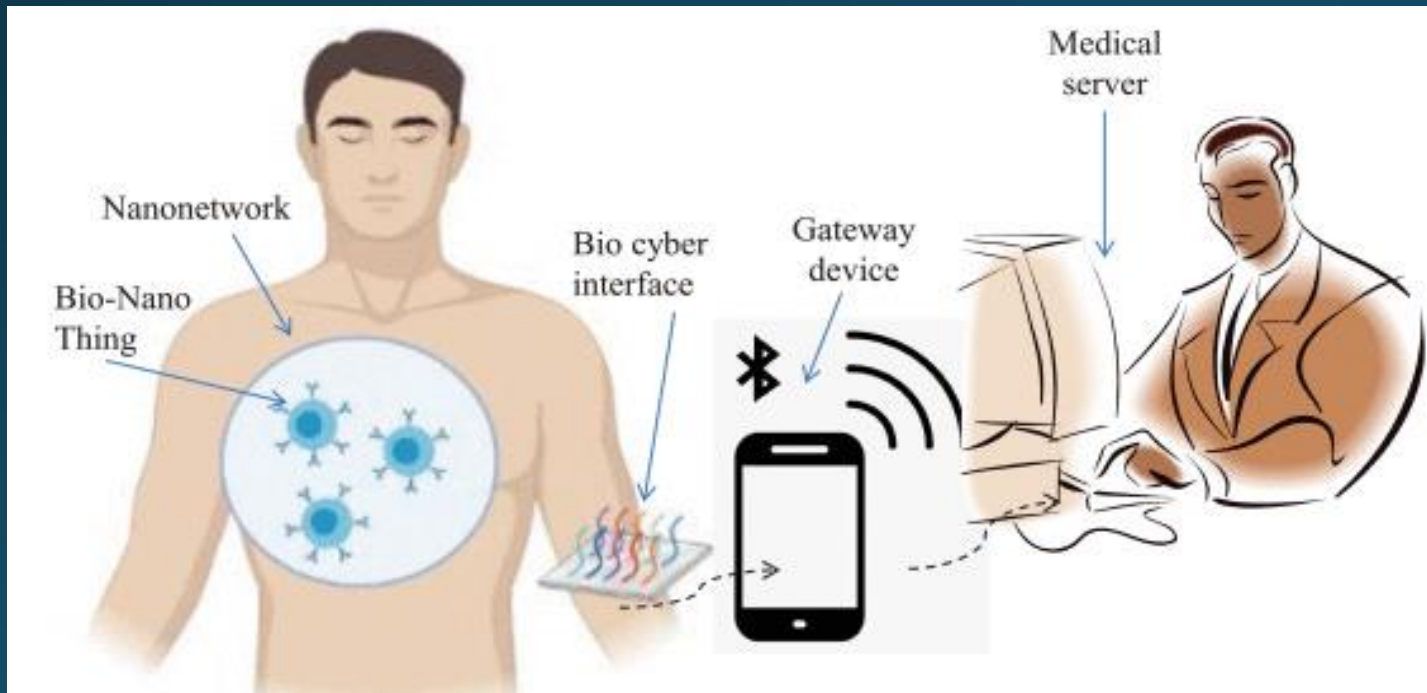

- Essentially, connecting human brains and bodies to an external control network
- Planning for the “NBIC” (Nano Bio Info Cogno) era goes at least as far back as the early 2000s in literature by NASA, the National Science Foundation, the RAND Corporation, and other non-healthcare-related organizations (Hughes, [2024a](#), pp. 337-338)

# The Internet of Bionano Things (2015)

- Biodigital convergence in practice. Associated with Prof. Ian F. Akyildiz
- Bio-cyber interfaces “translate information from the biochemical domain of Bio-Nano Thing networks [inside the body] to the Internet cyber-domain” and vice versa (Akyildiz et al., 2015, p. 38)

Zafar et al. (2021, Figure 3) – marketed under a healthcare pretext, but the idea of connecting human bodies to the internet originates much earlier, in a non-healthcare context

# Health or National Security?

In a presentation to NATO, Akilydiz (2023) reveals that his research since the 1990s has been conducted in conjunction with NASA, the U.S. Army, the National Science Foundation, the CIA, DARPA, and the U.S. Air Force

# TARGETING THE BRAIN

# The Brain as the 21<sup>st</sup> Century Battlescape

Weaponised neurotechnology can be used to:

1) assess, predict, and control particular cognitions, emotions, and behaviors; 2) mitigate aggression and foster cognitions, emotions, and/or behaviors of affiliation or passivity; 3) incur burdens of morbidity, disability, or suffering and in this way “neutralize” potential opponents, or 4) induce mortality. (Giordano, 2017)

That is, it can be used to control subjective experience and behavior and leave a target sick, disabled, or dead

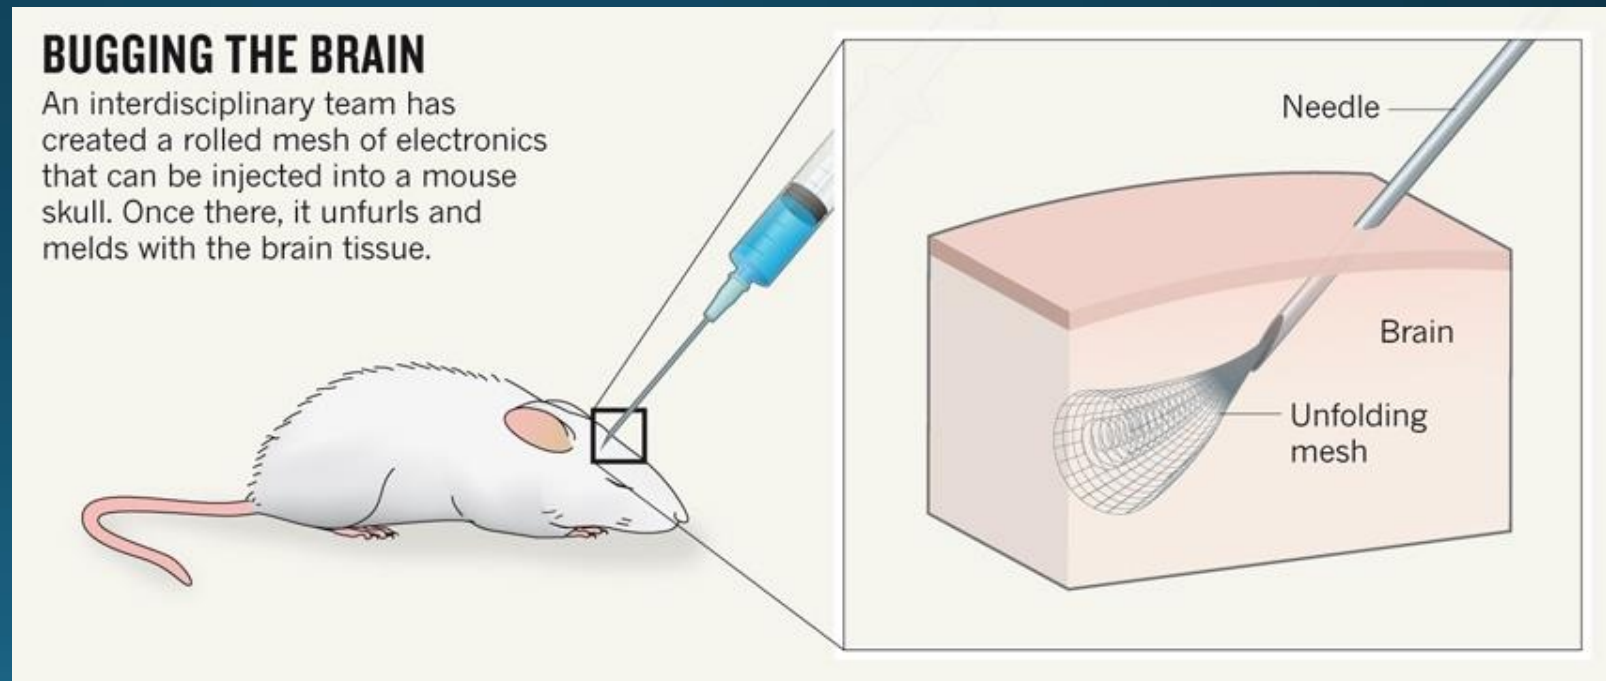

Pentagon neuroscience adviser James Giordano

# Syringe-Injectable Neurotechnologies

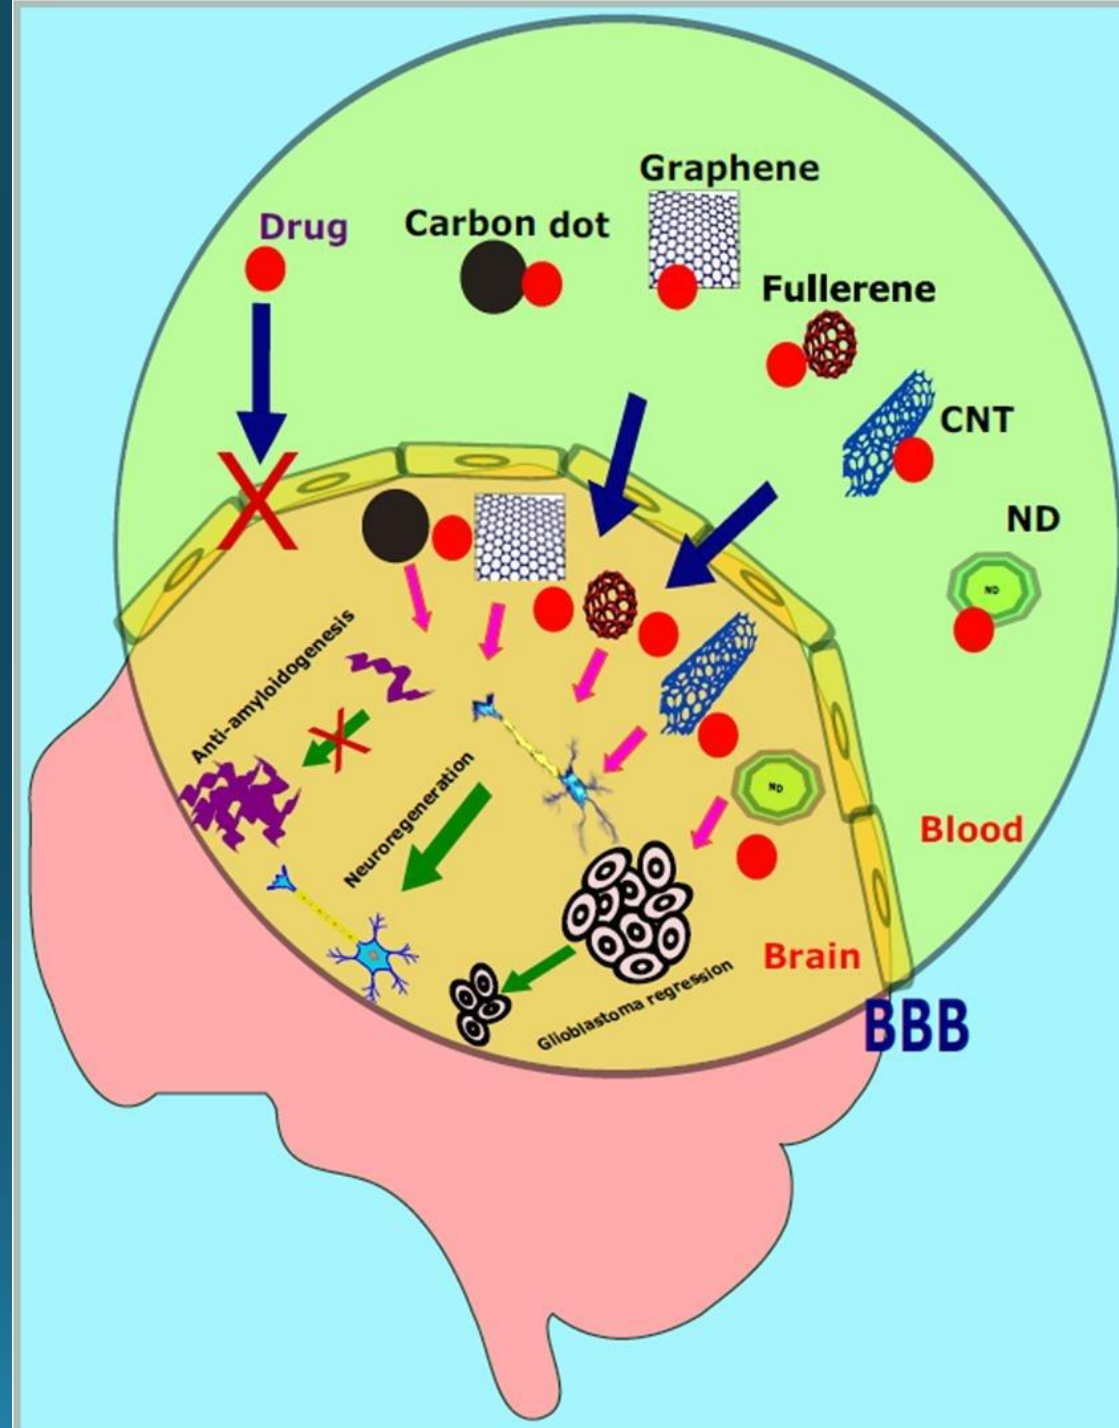

The way it works is to “put minimal sized electrodes in a network within a brain through only minimal intervention to be able to read and write into the brain function, in real time, remotely” (Giordano, 2018)

Charles Lieber and his team had successfully injected neural nets directly into the brains of rats, which seamlessly integrated with neural tissue (Templeton 2015; Hong et al., 2018)

# Crossing the BBB

- No need to inject directly into the brain
- Carbon-based nanomaterials, such as graphene, can cross the Blood-Brain-Barrier following peripheral injection (Calabrese et al., 2021, § 4.2)
- Incorporating drugs into nanocarriers capable of penetrating the BBB is “a simple technique” (Hanna et al. (2020) – see right:

# Syringe-Injectable Neurotech for Humans

In 2019, DARPA contracted the tech development company Battelle for its “next-generation non-surgical neurotechnology” program

“Bi-directional brain control technology interfaces” can be “introduced into the body via injection and directed to a specific area of the brain” via magnetoelectric signals (Army Technology, 2019)

# 2020: The Universal “Vaccination” Campaign Begins

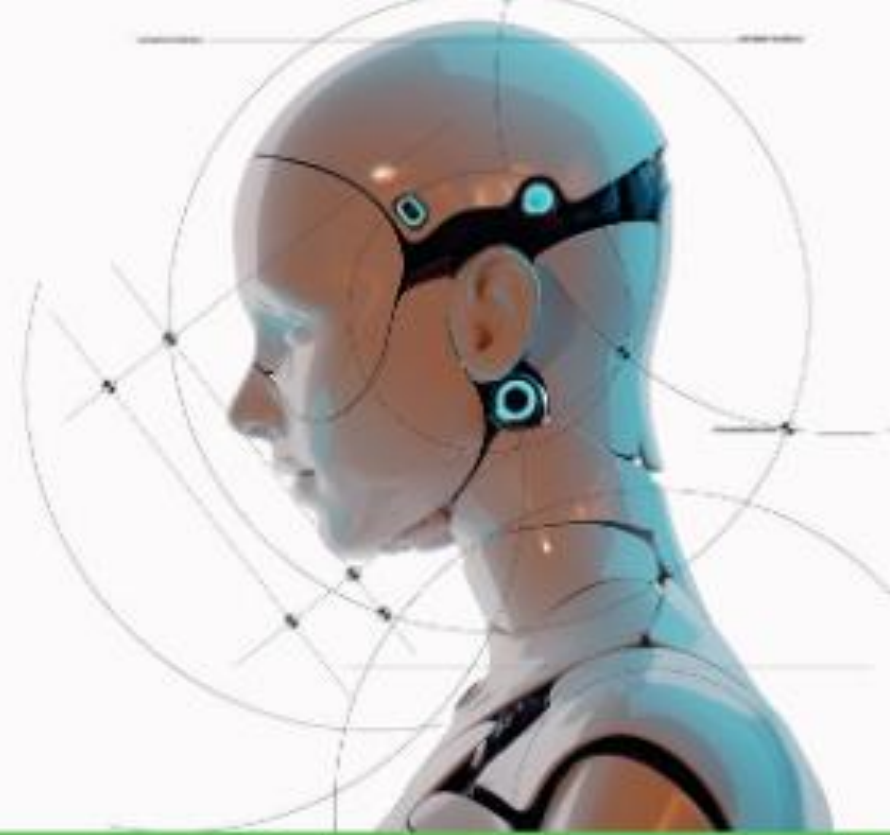

- Gates April 9, 2020:  
“normalcy only returns  
when we've largely  
vaccinated the entire  
global population”
- March 2023: A reported  
5.55 billion people  
injected (Holder, 2023)

# NATO's Joint Warfare Centre

"The human mind is becoming the battlefield of tomorrow, and this means that every person is a potential target. Warfare is no longer a purely military concept; it has become much broader and more complex. In the future, there will only be one rule in warfare: There are no rules" (van der Klaauw, 2023, p. 101)

I.e., lawless, unrestricted warfare against the population

"Neural nanotechnology can be used to bring nano-sized robots close to a neuron via the bloodstream and make it possible to link the human brain directly to a computer, making use of artificial intelligence in the process."

# ALTERNATIVE DELIVERY MECHANISMS

# Smart Dust

a nano-swarm of biopenetrable materials that you cannot see, that can penetrate all but the most robust, biochemical filters, that are able to integrate themselves through a variety of membranes, mucus membranes, and wherever – mouth, nose, ears, eyes – [eventually diffusing directly] into the brain space, and these can be weaponized [such] that their presence is almost impossible to detect, and as such, the attribution becomes exceedingly difficult to demonstrate. (Giordano, 2018)

# Smart Dust: Delivery Mechanisms

- Injections, GMO mosquitoes, bioengineered food, and stratospheric aerosol injection (“chemtrails”) are all potential mechanisms for delivering smart dust/sensors into human bodies, promising “a synthetic network on the inside which can be remotely controlled from the outside” (Light, 2017)
- Is “stratospheric aerosol injection” (Young, 2023; Tracy et al., 2022; Thompson, 2023), i.e. supposed plans to dim the sun, a decoy?

# Bioengineered Food

- “Pharma Food” (van Hamelen, [2022](#)) as a potential delivery mechanism for biotech
- The WEF’s synthetic meat and eating insects agendas (Whiting, [2020](#); Hubert, [2021](#))
- The war on farmers (Vanheuckelom, [2023](#); van Hamelen, [2023](#); Beck, [2024](#))
- Attacks on food manufacturing plants (Hoft, [2023](#); Corbett, [2023](#)) , while Bill Gates and Ted Turner become the largest owners of US farmland (Scribner, [2022](#))

PHARMA FOOD

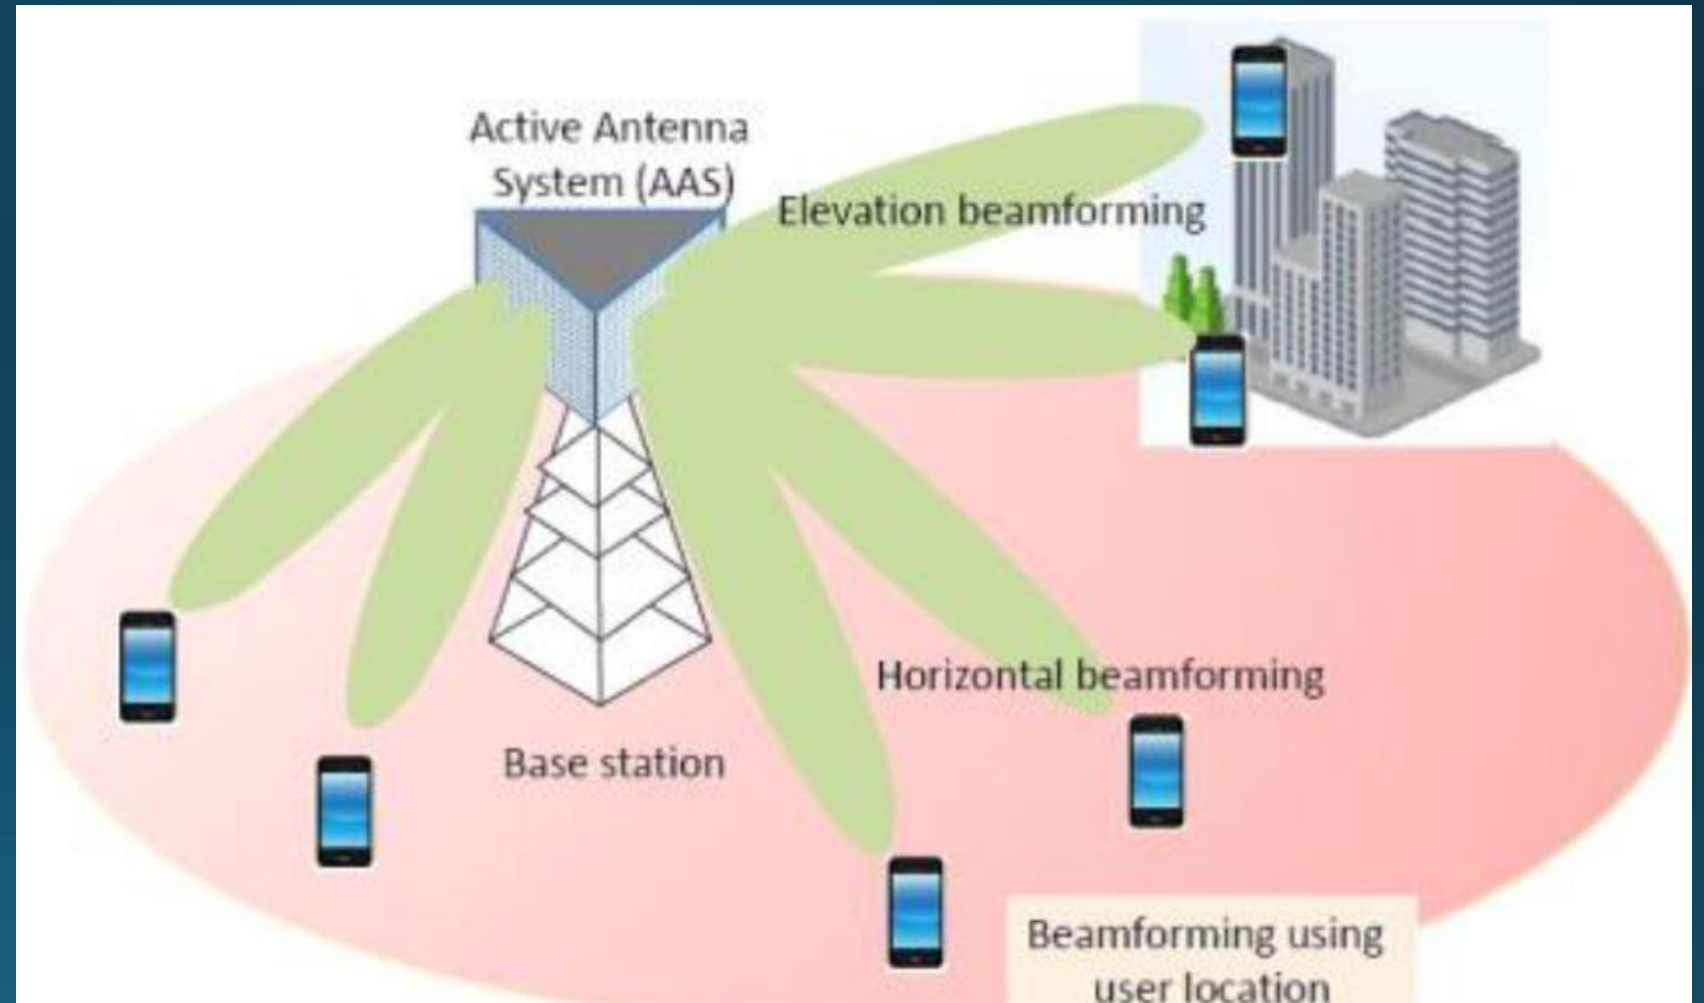

Biotech on Your Plate:

The Next Chapter in Big Money's Battle to End Food Sovereignty

# REMOTE CONTROL NETWORKS

# Remote Control Mechanisms

5G beamforming technology – qualitatively different from previous generations of cell phone technology, capable of targeting individual devices

# Targeting Individual Brains

Duke University professor Nita Farhany advocated at the World Economic Forum for a “massive” shift from “wearables” to “implanted [brain] technology” (cited in Rankovic, 2023)

In a military context, this would allow human brains to be targeted as precisely as individual smartphones are by 5G

# No Escaping 5G?

- Elon Musk's Starlink, Amazon's Project Kuiper, OneWeb, and EarthNow are all vying to provide internet coverage to all parts of the world from low earth orbit
- Companies such as Stratospheric Platforms beaming 5G from drones and airplanes
- The aim is to make the 5G (and subsequent 6G, 7G, etc.) networks ubiquitous

Visualization by Bloomberg (2019)

# CONCLUSION

# Summary

1. The existing control system went into crisis in 2019, which is why the war for technocracy began in 2020
2. That war assumes the form of an Omniwar, waged clandestinely against the population across all areas of life
3. Everything that can be weaponized against the public is being weaponized
4. Network-centric warfare leverages information networks and is increasingly powered by A.I.
5. Plans to connect human bodies to the control grid, dating back to the early 2000s, are coming to fruition via the Internet of BioNano Things
6. The brain is now targetable via syringe-injectable neurotechnologies and "smart" dust while wireless networks are becoming inescapable

# Implications

- Like it or not, we are all combatants in World War III
- The aggressors in that war are fighting for global technocracy, a totalitarian control system premised on biodigital technologies
- If they are successful, the result will be a novel (and potentially irreversible) slavery system whereby technocrats have total control over your life
- Plans to engineer human bodies to render them compatible with a ubiquitous wireless control network, camouflaged by transhumanism, are decades in the making
- If human brains and bodies become nodes on a biodigital control grid, remote control torture and assassination cannot be ruled out, nor can automated decisions taken by A.I.

# Resistance

- Resistance begins by understanding what it is that we are facing. I have sought to lay that out here
- Armed with this knowledge, each of us has a moral obligation to act: different people bring different talents to bear, collective action is key, defeatism is unacceptable
- Resistance is needed to all aspects of the Omniwar – find where *you* can make a difference
- We have the numbers on our side – spreading awareness and understanding is crucial
- The enemy is reliant on biodigital technologies – strategically, this is where our attention should be focused
